

BEST PRACTICE CHARTER FOR RENEWABLE ENERGY PROJECTS

We commit to honouring the Clean Energy Council's Best Practice Charter in our renewable energy projects and associated transmission infrastructure:

- 1 We will engage respectfully with the local community, including Traditional Owners of the land, to seek their views and input before submitting a development application and finalising the design of the project.
- 2 We will provide timely information and be accessible and responsive in addressing the local community's feedback and concerns throughout the life of the project.
- 3 We will be sensitive to areas of high biodiversity, cultural and landscape value in the development and operation of projects.
- 4 We will minimise the impacts on highly productive agricultural land and explore opportunities to integrate agricultural production.
- 5 We will consult the community on the potential visual, noise, traffic and other impacts of the project, and on the mitigation options.
- 6 We will support the local economy by providing local employment and procurement opportunities.
- 7 We will offer communities the opportunity to share in the benefits of the project, and consult them on the options available, including relevant governance arrangements.
- 8 We commit to using the project to support educational and tourism opportunities where appropriate.
- 9 We will demonstrate responsible land stewardship over the life of the project and welcome opportunities to enhance the ecological, cultural and/or agricultural value of the land.
- 10 During the life of the project, we will recycle waste materials where feasible and commit to responsible decommissioning or refurbishment/repowering of the site at the end of the project's life.
