

# Infigen Energy completes re-brand to Iberdrola Australia

**1 June 2021**

Today we are pleased to announce the completion of our brand transition from “Infigen Energy” to “Iberdrola Australia”. The brand transition follows the friendly acquisition of Infigen Energy by Iberdrola, announced in June 2020, and completed in December 2020. The Iberdrola brand is globally recognised for its exceptional financial strength, its leadership in corporate social responsibility, and its proven commitment to rapid renewable energy growth.

**Managing Director and Chief Executive Officer of Iberdrola Australia Ltd, Ross Rolfe, AO, said:**

“Infigen, now Iberdrola Australia, has a fifteen year history of leading the renewable energy transition in Australia. Central to our strategy is the belief that customer needs should be at the heart of the renewable energy transition. All across the country we are seeing Australian households, businesses and industries voluntarily transition to green power. These choices demonstrate that Australian consumers are increasingly committed to energy solutions that preserve our natural environment and reduce our reliance on fossil fuels. At Iberdrola Australia, our strategy is to help Australian businesses and industries achieve these environmental sustainability objectives. We are delighted to have joined the Iberdrola Group, a global renewable energy leader with deep financial resources and unparalleled growth targets. We have never been better positioned to serve Australian customers”.

**Global Director of Renewables at Iberdrola SA, Xabier Viteri, said:**

“In 2020 Iberdrola made a long-term commitment to Australia. There are significant opportunities to expand the role of clean renewable energy and to help navigate the path to Net Zero. Our experience around the world shows that technologies like coal can be replaced by wind and solar and storage, at a lower cost and at the same time creating high quality long-term jobs. We want to be at the centre of Australia’s energy transition and help customers to benefit from electricity supplies that are reliable, affordable and clean.”

**About Iberdrola Australia:**

Iberdrola Australia is leading Australia’s transition to a clean future, today. Our strategy is to put customers at the centre of the renewable energy transition, by providing them with firm supplies of clean energy. We partner with our customers to help them deliver their sustainability and renewable energy goals. At Iberdrola Australia we operate one of the largest portfolios of renewable energy assets in the country and we have invested in a fleet of flexible, fast-start firming assets that manage intermittency risks.

Iberdrola Australia's customers include manufacturers, universities, councils, food and beverage producers, electric vehicle manufacturers, commercial property operators, industrial utilities, timber processors and large-scale infrastructure assets. More information on our customer offerings is available at: [www.iberdrola.com.au](http://www.iberdrola.com.au)

**About Iberdrola S.A.:**

Iberdrola is a global energy leader, the number-one producer of wind power, and one of the world's biggest electricity utilities by market capitalisation. Iberdrola has over 55GW of installed capacity with leading market positions in Spain, the UK, the US and South America. Iberdrola is listed on all four Spanish stock exchanges and has an American Depository Receipt (ADR) that trades on the New York Stock Exchange. Iberdrola provides energy to 34 million customer billing points worldwide.
